Extension	2015	University of Agriculture, Faisalabad- Pakistan	<p>Research Title of PhD thesis: “Present and prospective role of ICTs in bridging the information gap regarding livestock production technologies among female farmers of Okara Dist. Punjab- Pakistan”. PhD. Research focused the area of livestock extension with special perspective ICTs intervention utilization and gender context. From this research we have found that female farmers had less access to ICTs and their farm production was also meager. They rely mostly on their male family members. They should be entitled as marginalized group so that all the stakeholders must focus their sustainability to enhance their ICTs utilization to improve production.</p>
